

FOR IMMEDIATE RELEASE

Becker Avionics at AERO Friedrichshafen

Friedrichshafen, 10th April 2019 – Becker Avionics is attending AERO, the leading show for General Aviation. This 4-days event is held in April 10-13, 2019 at the Friedrichshafen convention center in Germany.

Beckers' team of over seven industry professionals are welcoming you, including new CEO Hans Joachim Venrath, Director of Sales and Marketing Armando Gessinger, Solutions Manager Thomas Knapp, as well as for decades experienced Customer Support Manager Gerhard Schweinfurth.

The international air show is taken as an opportunity to discuss strategic partnerships in future-orientated topics such as UAVs, to showcase the company's sophisticated products, e.g. the EASA certified BXT6553 Mode S transponder, designed specifically for full interoperability with existing TCAS II systems, all while being ADS-B compliant and to talk about tailored solutions. "After all, the customers' need is the real driver behind our development efforts", states Armando Gessinger.

About Becker Avionics GmbH

BECKER Becker Avionics is a leader in digital avionics technology. Becker Avionics is a privately held high-tech company that develops, manufactures and distributes the latest communications, navigation, surveillance and search & rescue equipment for airborne and ground operations. Becker Avionics has a long standing history of over 60 years in providing equipment to general and corporate aviation, air traffic control, law enforcement and military organizations around the world.
