

Becker Avionics Poland obtains funding by Polish Authority

Rheinmuenster, Germany /Wroclaw, Poland,
October 6th 2021.

Becker Avionics Poland, a subsidy of Becker Avionics Group, signed a grant contract with Polish Authority. It covers a governmental funding for a two-year project. The funded project, targeting the General Aviation market, will realize enhanced airborne Multi-GNSS GPS/SBAS receiver ready for serial production. The whole project has started already and will be finished by June 2023.

Major improvements of the receiver will be:

- Enhanced anti-jamming capabilities,
- Measures to identify and mitigate intentional interference (spoofing),
- block-chain track recording.

Target markets for the equipment are civil aviation light aircraft and UAV/UAM. The main function of the GNSS receiver is to provide position, velocity, and time information for a navigation management unit, or a non-navigation application such as an Automatic Dependent Surveillance-Broadcast (ADS-B) or Terrain Awareness and Warning System (TAWS). The receiver will be capable to process navigation messages from GPS, Galileo, and other systems.

About

Becker Avionics is a privately held high-tech company that develops, manufactures and distributes the latest communications, navigation, surveillance and search & rescue equipment for airborne and ground operations. The company is a leader in digital avionics technology and has a long-standing history of 65 years in providing equipment to general and corporate aviation, air traffic control, law enforcement and military organizations around the world.
