

## Becker Avionics is entering the UAS market with transponders, powered by Sagetech Avionics

Rheinmuenster, Germany, 9<sup>th</sup> December 2021.

Becker Avionics is teaming with Sagetech Avionics to enter the European Unmanned Aircraft System (UAS) market. The primary focus is to partner with drone manufacturers in the DACH region, as well as France, Poland, Sweden and many more. Additionally, as Asia continues to evolve the UAS industry and Becker will contribute to this by leveraging its decades of experience partnering with the most prominent aerospace providers in Asia .

By combining Becker Avionics strong brand presence, technical expertise and customer relationships with Sagetech's proven UAS civil transponder and military IFF solutions, the partnership will provide the European UAS market with world-class situational awareness solutions.

Becker Avionics has provided transponders for civil and military missions for a wide range of aircraft since 1956. With its long history of transponders, the company looks forward to supporting one of the most innovative segments of the aviation industry.

Wolfgang Kuehling, CEO of Becker Avionics, commented: "Becker Avionics is thrilled to leverage our experience and reputation in transponders, as we expand into the UAS market. Sagetech is the perfect partner and we are excited to start this collaboration."

### About

*Becker Avionics is a privately held high-tech company that develops, manufactures and distributes the latest communications, navigation, surveillance and search & rescue equipment for airborne and ground operations. The company is a leader in digital avionics technology and has a long-standing history of 65 years in providing equipment to general and corporate aviation, air traffic control, law enforcement and military organizations around the world.*
